Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 8-13 are rejected under 35 U.S.C. 102(e) as being anticipated by Bullock '995.

In regard to claim 8 the patent to Bullock discloses an applications programming interface library in portable electronic device 104. The position module 134 determines a geographic location of the device. The guidance and mapping module 128 guides provides guidance information. Routing module 146 provides map data. The user accesses specific data to customize the application. In regard to claim 12 the device 104 is described in column 2 as receiving audio and visual signals to be displayed on the device that may be a PDA or cell phone or computer. In regards to claims 9,10,11 and 13, column 4, lines 1-15 disclose that the communications node 104 can include a GPS unit, speedometer, compass, gyroscope, and the like. Navigation applications 128, 130 and 132 are coupled to internal and external positioning devices. These are dynamic and shared libraries. All computer readable mediums are removable and certainly a number of the modules listed above are in communication with the device.
